

Mobilising Reliable Indigenous Biomass Supply

Tom Egan

Head of Powergen & Bioenergy Operations

Forest Derived Residual Biomass

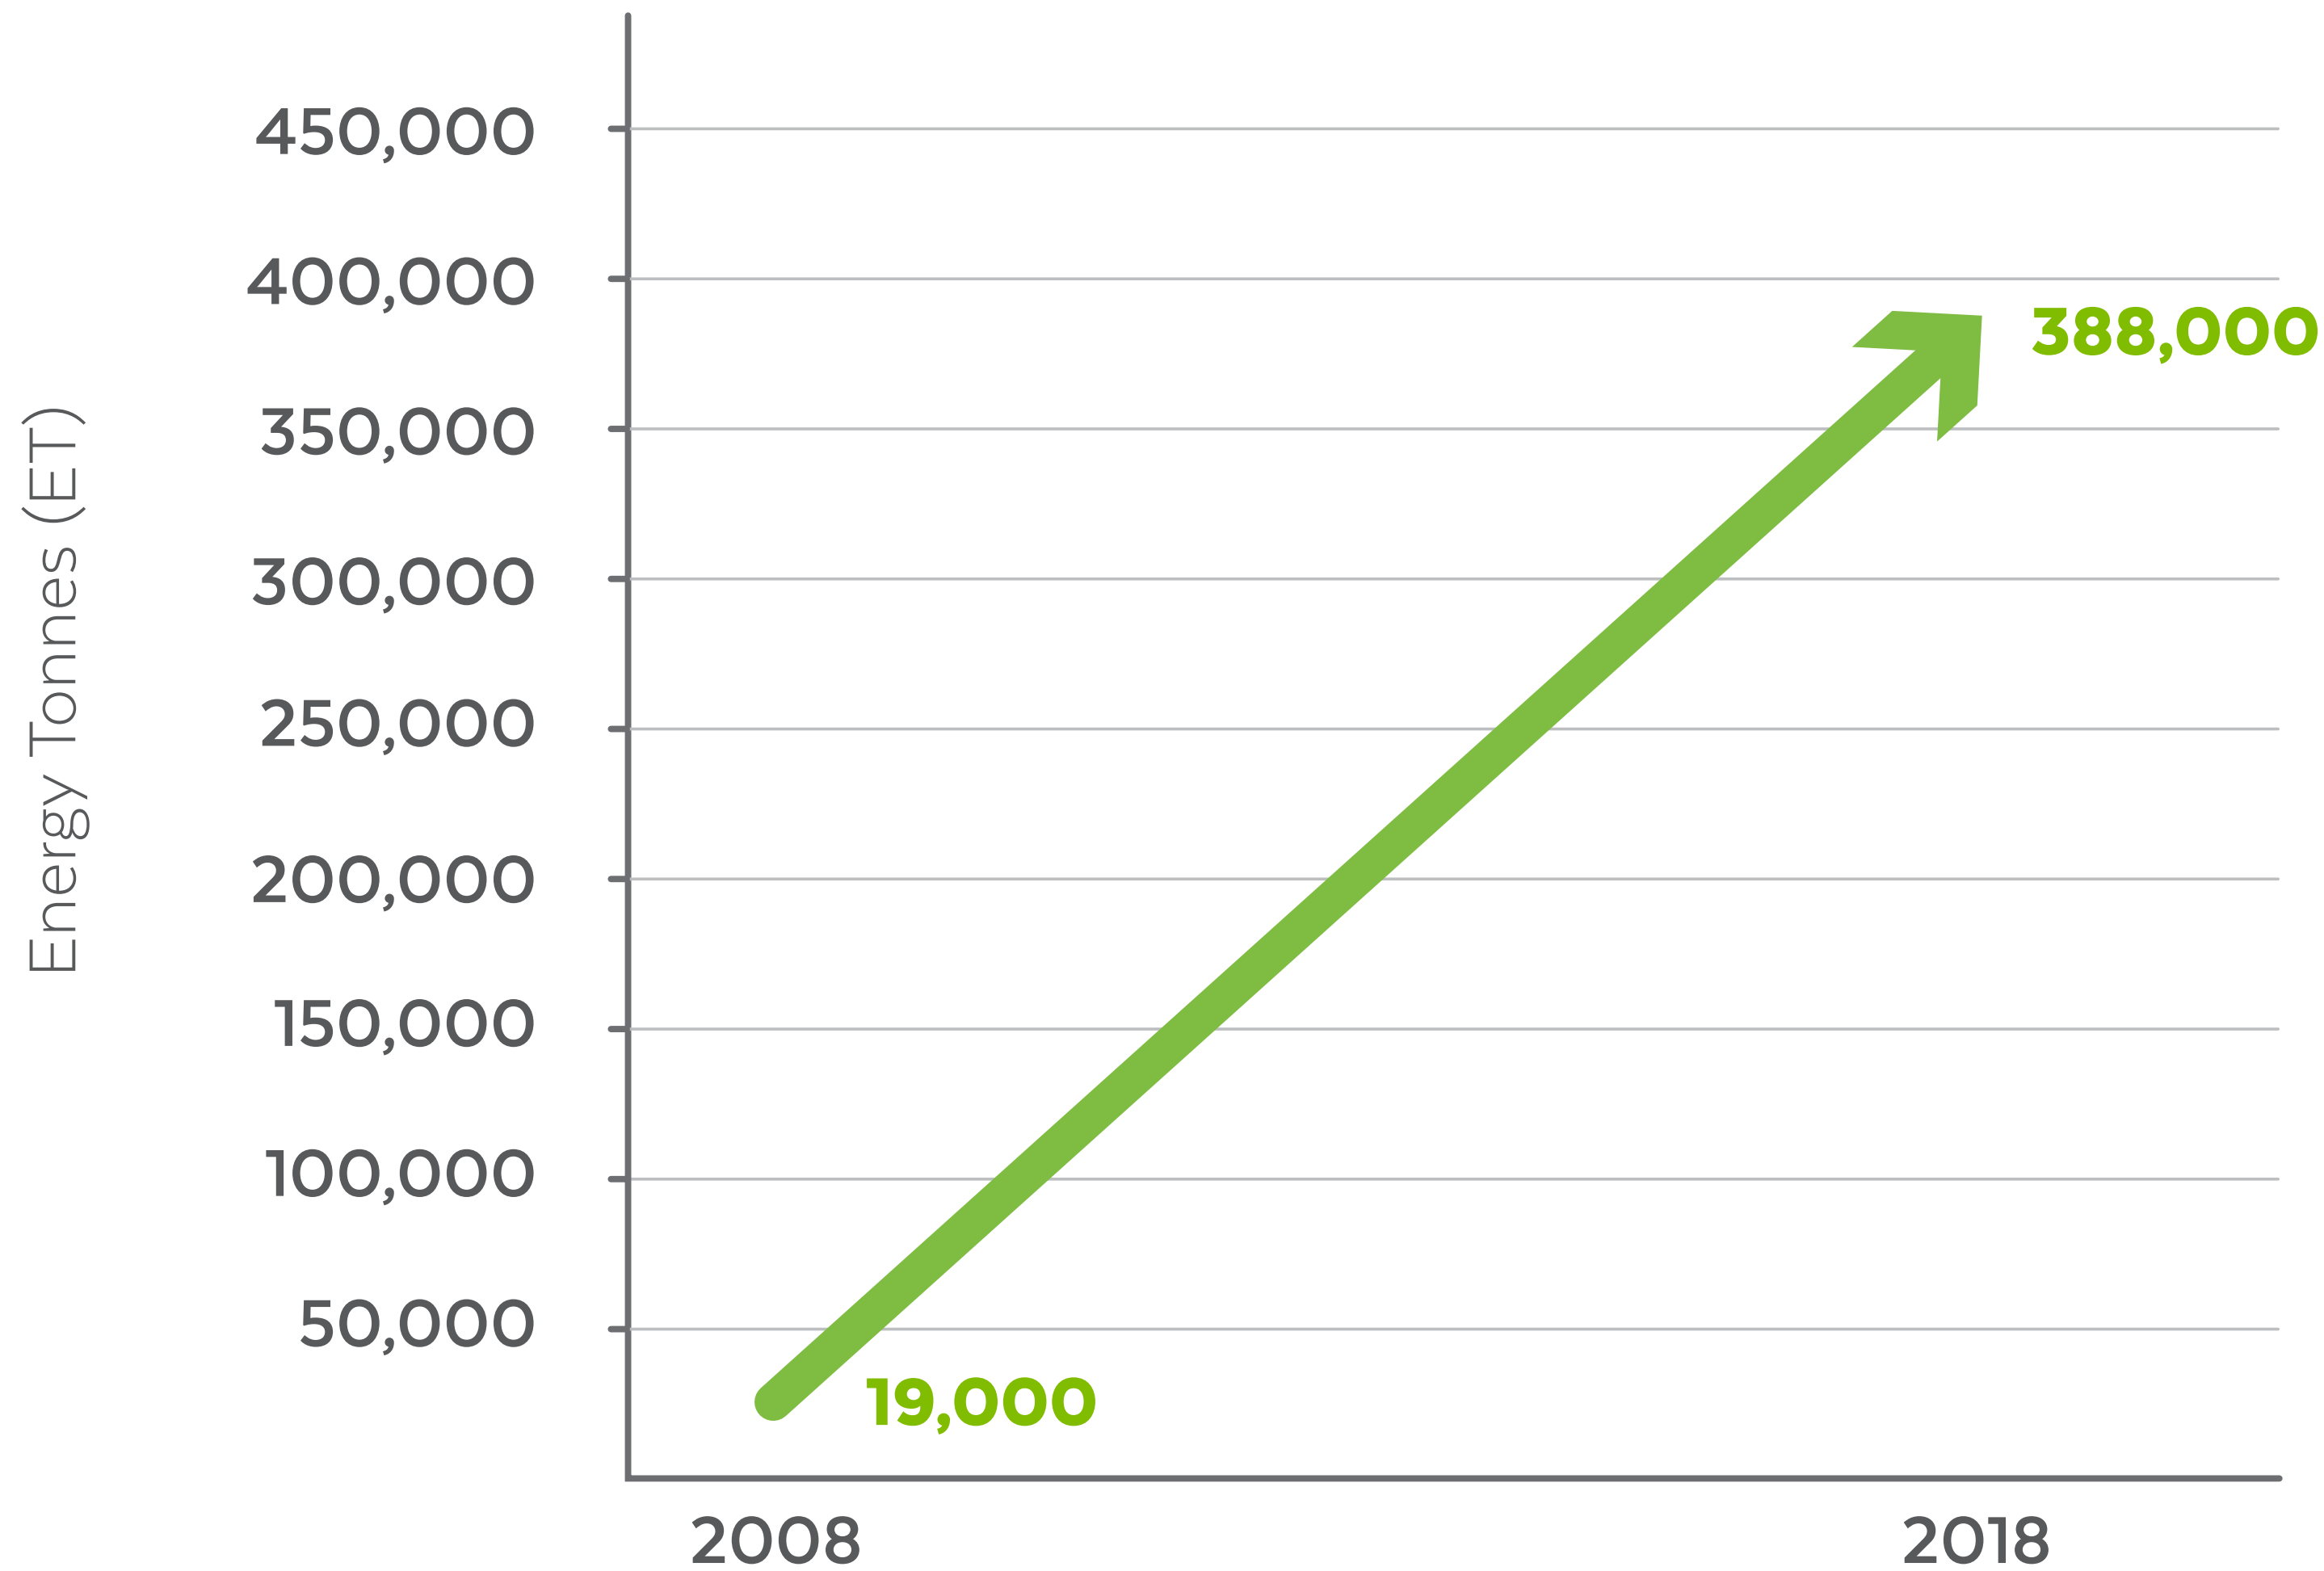

Bord na Móna does not harvest trees for Biomass supply

Bord na Móna take residual material

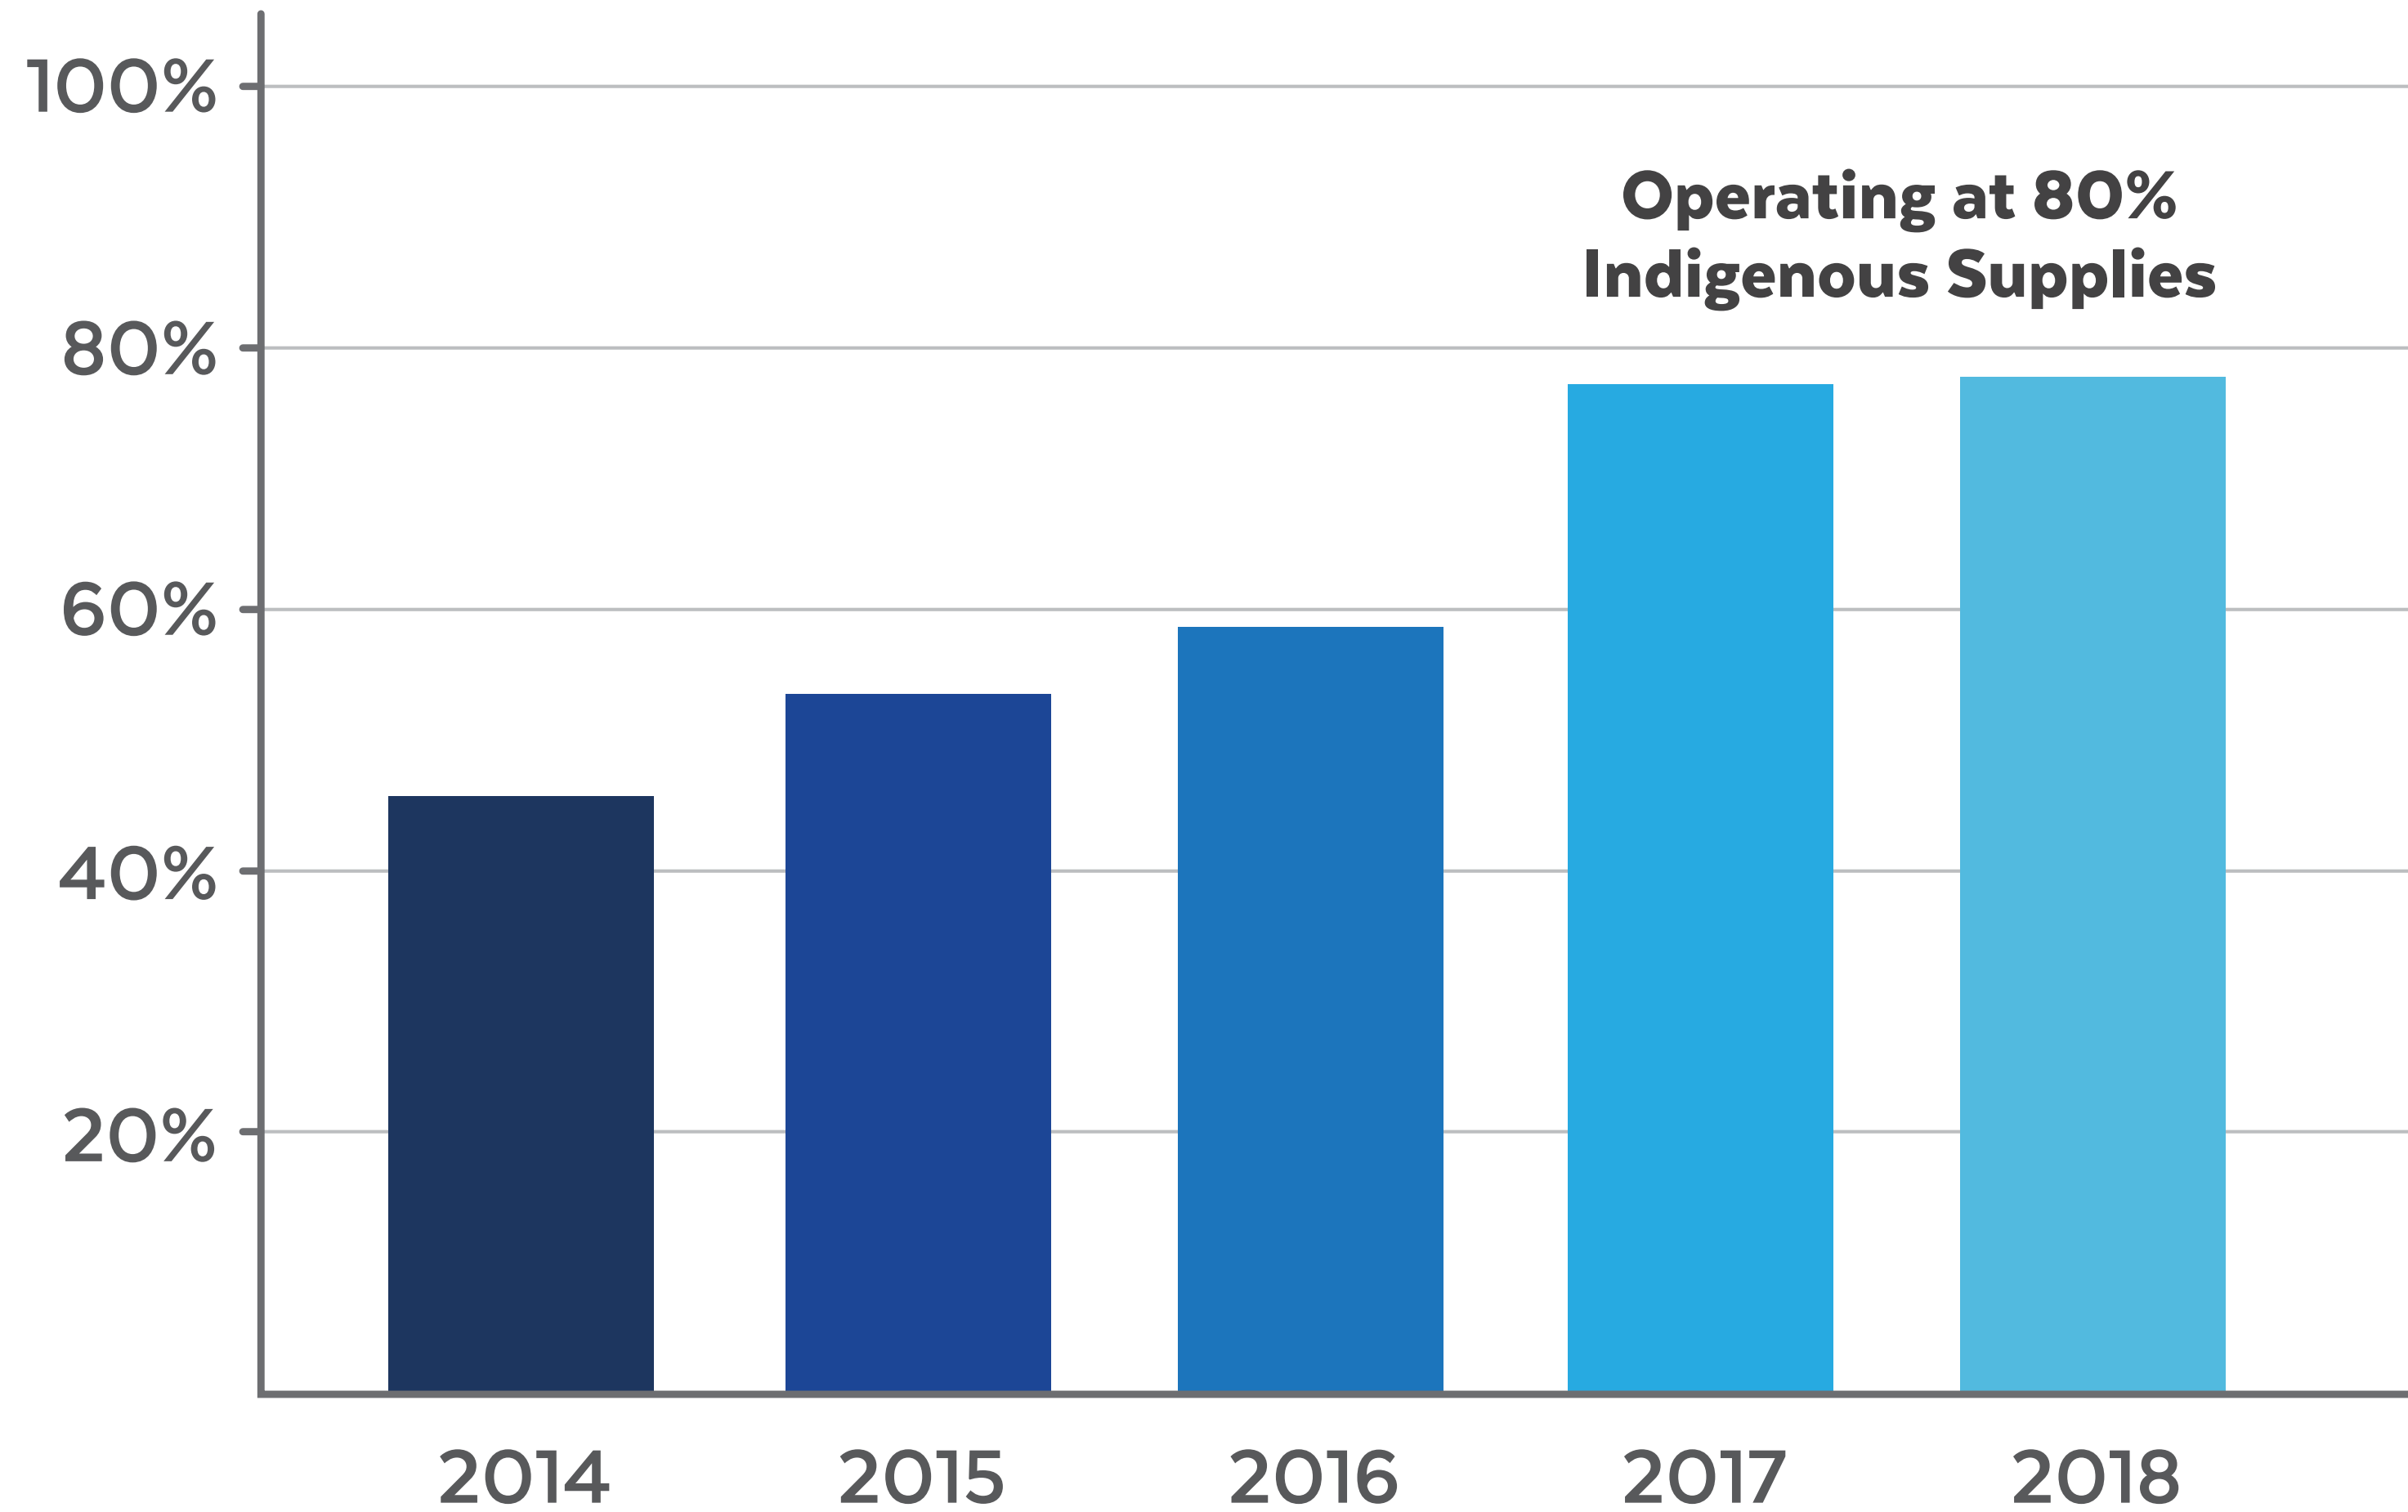

Bord na Móna provide a route to market

Biomass Supplies to EPL

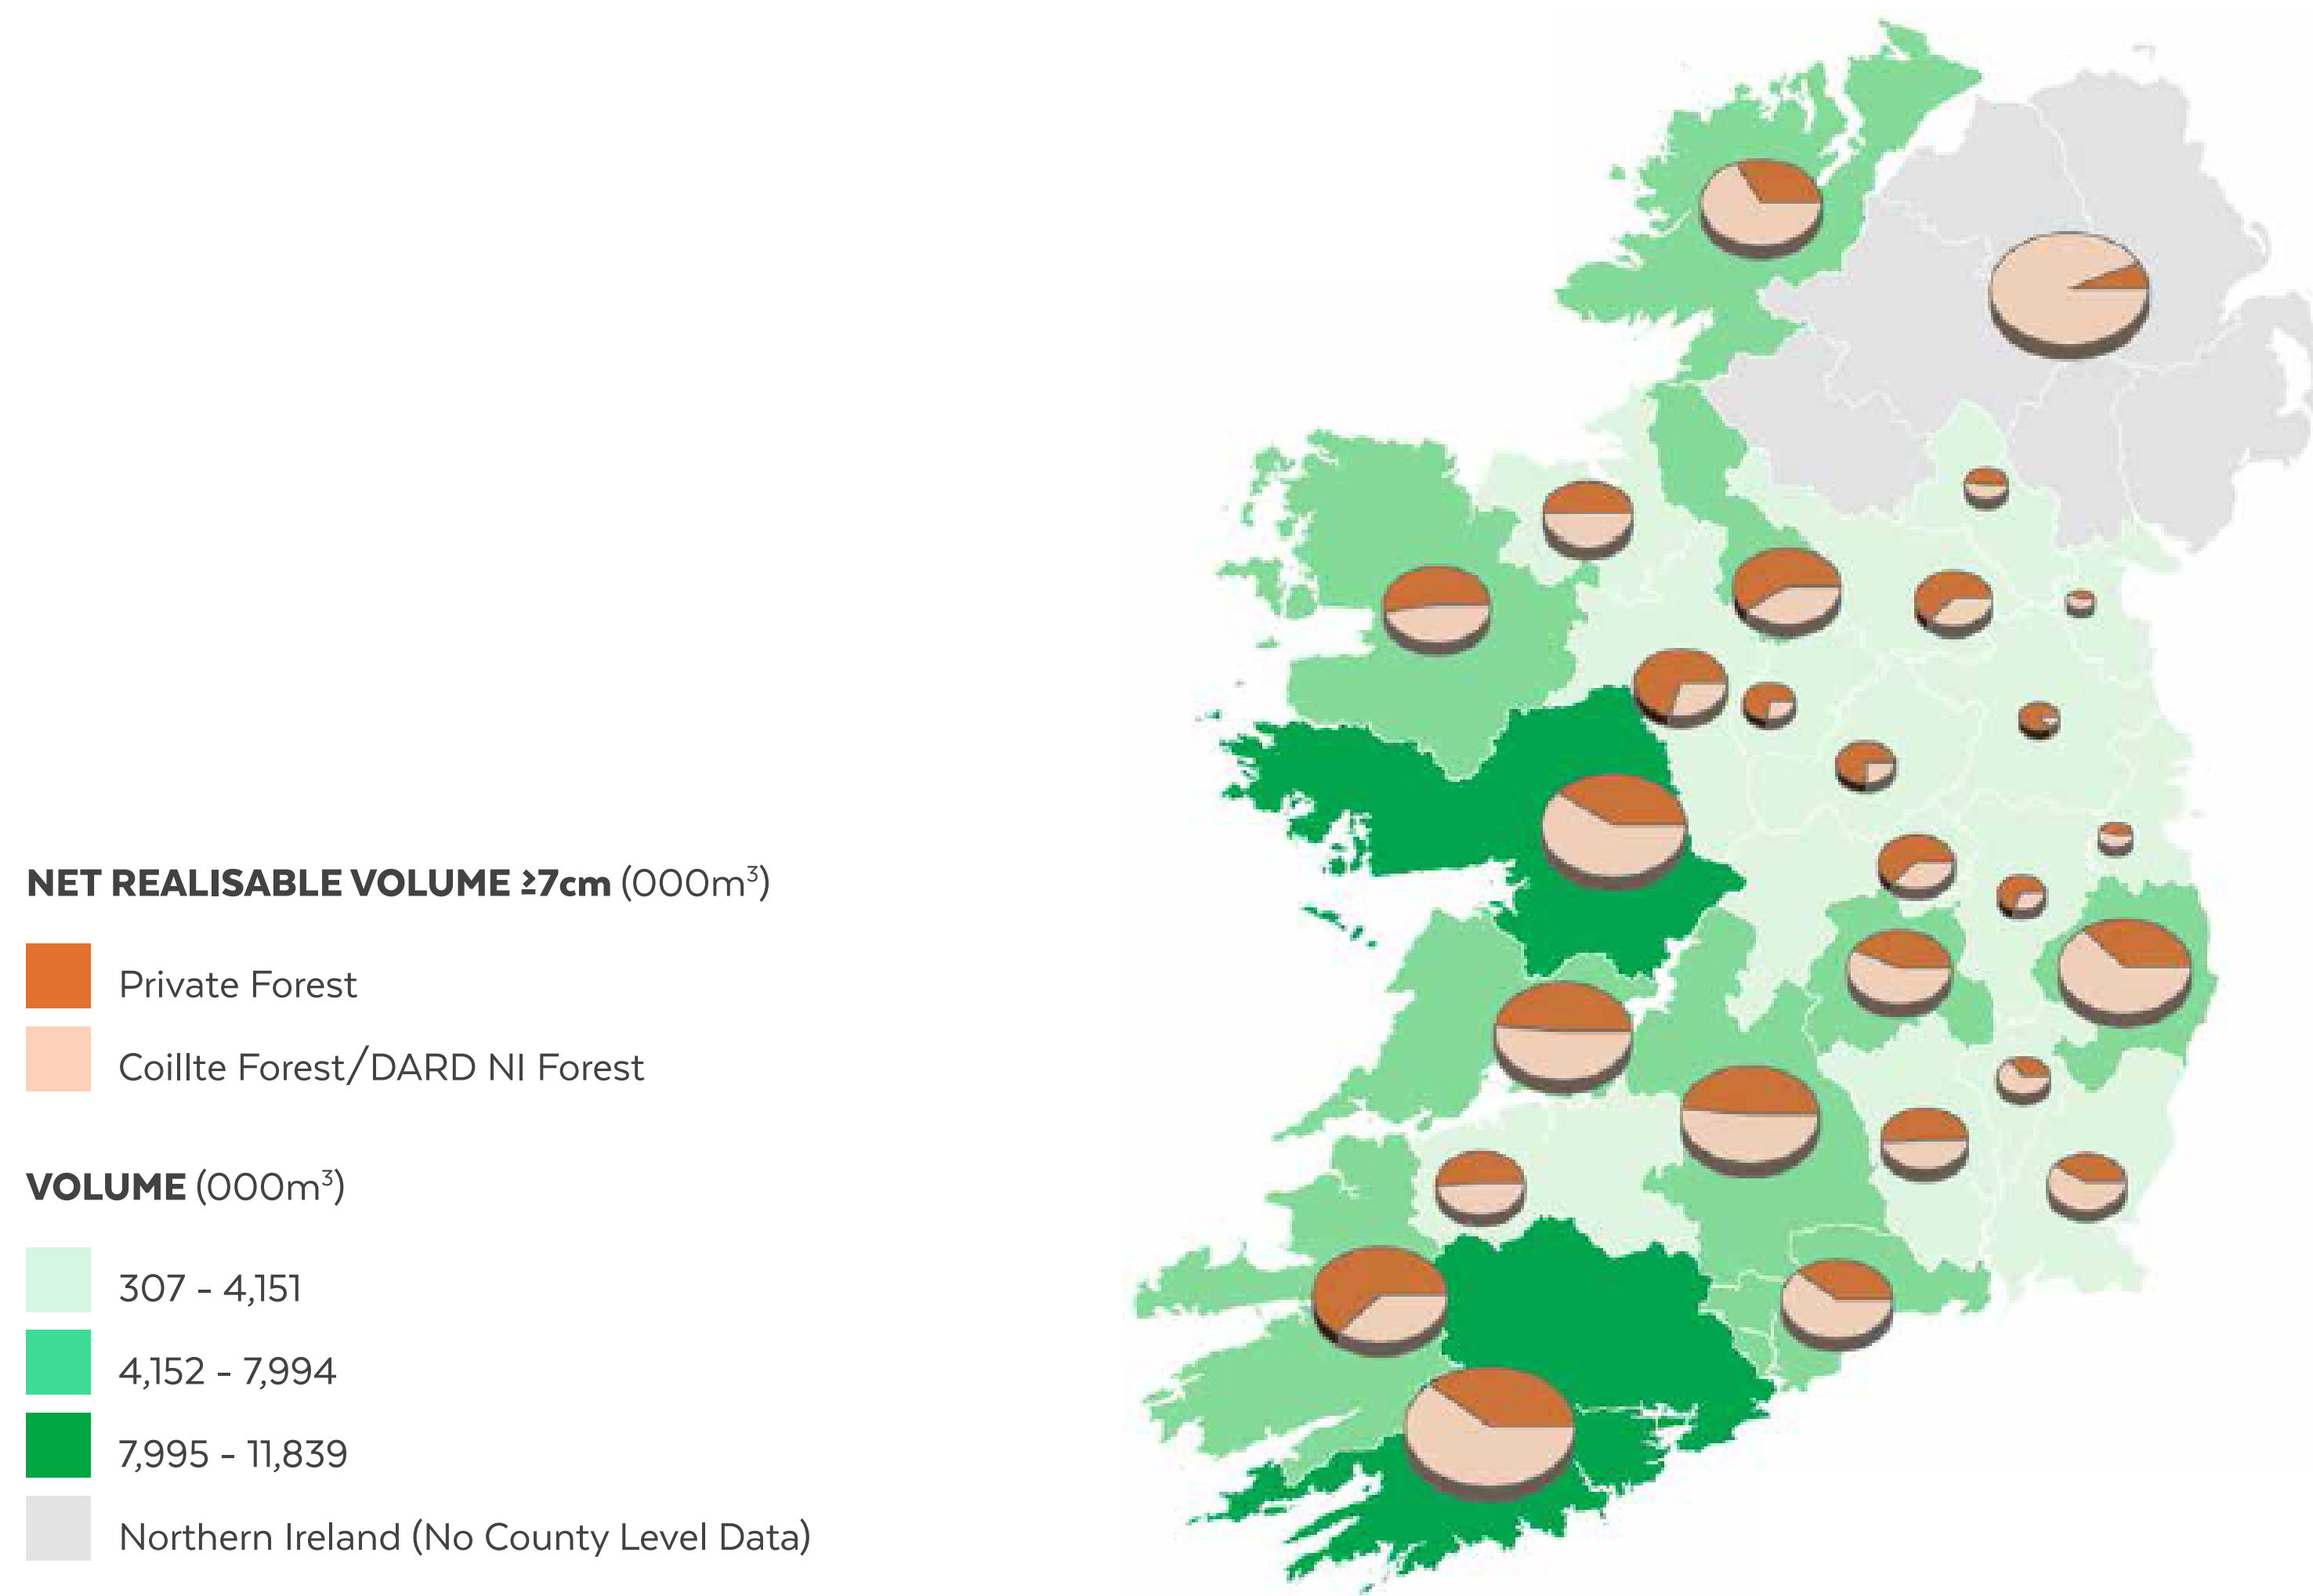

Increasingly using Biomass since 2008

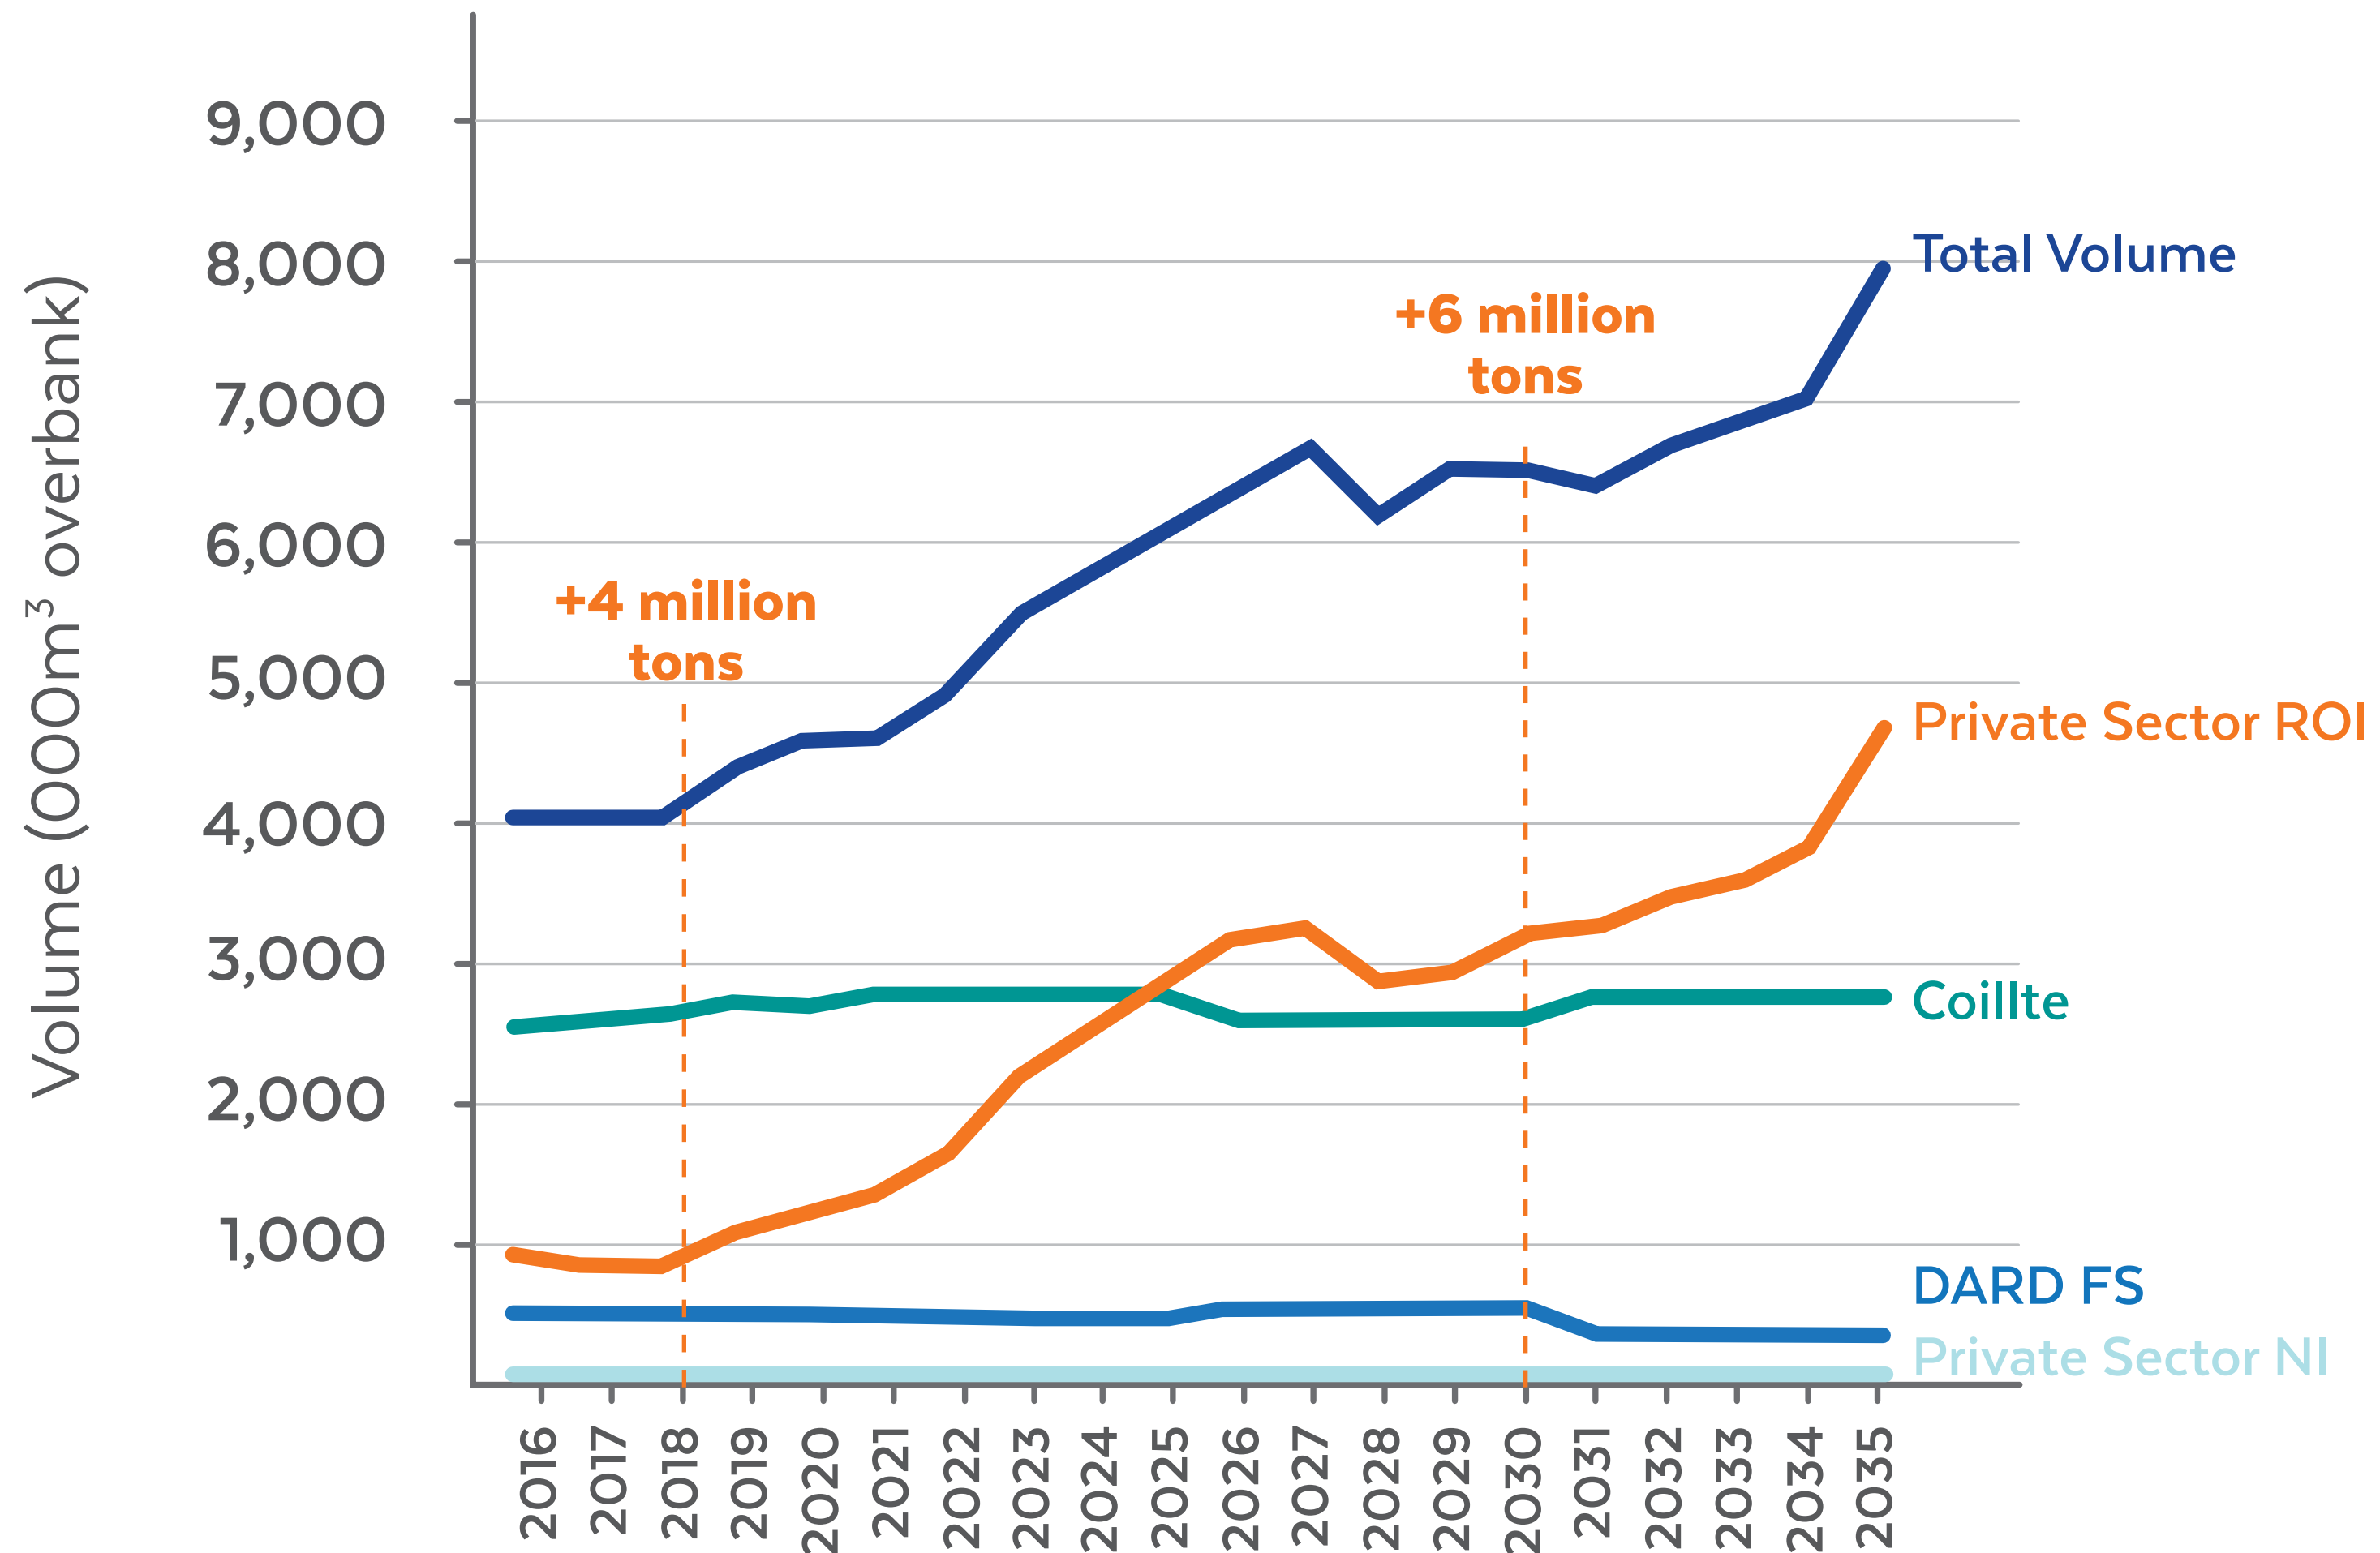

Indigenous Supplies to EPL

Wood Basket Location

Projected Realisable Forest Volume

Private Forest output projected to grow by 300% by 2030

Source: Coford All Ireland Roundwood Production Forecast 2016-2035

Biomass by Numbers

4 million tons

harvested in Ireland in 2018

6 million tons

projected harvest 2030

**c. 300,000 tons
of indigenous**

consumed by EPL in 2018

Edenderry Power can provide an **outlet
and value** for **residual material**

Helping develop
supply chains
for SSRH material
and **rural jobs**

Creating a **robust
supply chain** for
Ireland Inc. future
Bio-Economy

Optimising Existing Rail Network

BROWN TO GREEN

- EPL will not be increase truck movements beyond current planning limit
- Optimising existing Rail Network
- Maintaining Rural Jobs
- Reduced Carbon Emissions hauling by rail
- Contributing to the Just Transition

There's Enough for Everybody
